Health and fitness platform helping users track progress and improve health.

PROFILE

I'm a Lead UX Engineer and Service Designer with over a decade of experience designing, prototyping, and building digital products from concept to launch. I specialise in turning complex ideas into clear delivery plans through structured milestones and sprint-sized workstreams that improve visibility, reduce risk, and support business goals.

WORK EXPERIENCE

Lead UX Engineer, and Service Designer
2025 - PRESENT

The Scottish Government, (Contract Role)

- Leading UX delivery for digital services, ensuring accessible, inclusive, and citizen-focused solutions.

Senior Frontend Developer
2021 - 2024

Mind Foundry, an Oxford University spinout (Perm Role)

- Led UI/UX delivery for AI-driven analytics platforms, improving how users interact with machine learning insights through clearer data visualisation, and explainability.

Senior UI Developer
2019 - 2020

RBS / Tata Consultancy Services, (Contract Role)

- Led the UI team delivering React-based solutions, designing reusable components to improve delivery and support Agile sprint goals.

Senior Developer
2017 - 2019

Royal London, (Contract Role)

- Delivered robust frontend solutions with a strong focus on accessibility, usability, and UX improvement.

Lead Developer
2015 - 2016

Aberdeen Asset Management / CDS,
(Sub-Contract Role)

- Led development for CDS clients, including Aberdeen Asset Management, delivering tailored architectures and improved UI/UX.
